

SCOTTIE GOLD MINE PROJECT LAND AND RESOURCE USE SURVEY

Scottie Resources Corp (Scottie) is an exploration mining company proposing to advance the past-producing Scottie Gold Mine, located about 32 km north of Stewart, BC and Hyder, AK. Scottie has been conducting exploration activities in the area since 2017 and currently employs 50-70 people seasonally. We are in the exploration stage of this Project, completing technical and environmental studies and engaging with the community to help guide future decisions.

This survey will help us learn about the types of land and resource use activities that occur in and around the proposed mine. The information we receive will inform our current studies and permitting processes.

This survey is anonymous, and each question is optional. You can select “prefer not to say” to opt out of questions and skip ahead to the next one.

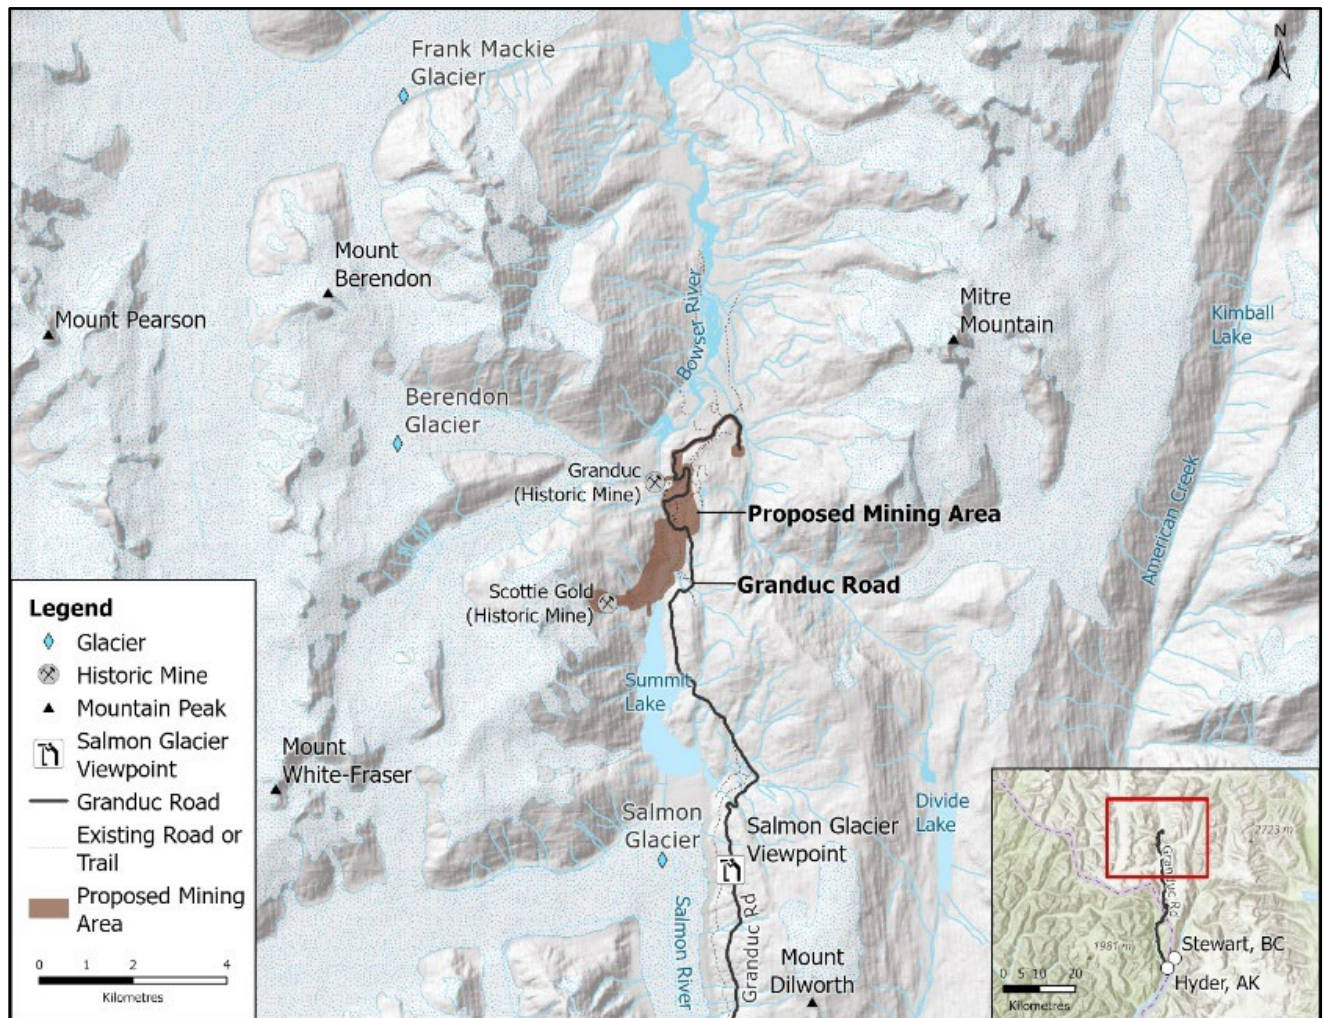

The survey should take approximately 10 minutes or less to complete.

Your participation in the survey is voluntary. Any information you are willing to share is greatly appreciated!

Please drop off or mail your completed survey to our Stewart Office located at:

317 5th Ave Stewart, BC V0T 1W0

Completed Surveys are due by **October 31, 2026**

Map of the Scottie Gold Mine Project Proposed Mining Area

INTRODUCTION

Scottie aims to restart gold production at the historic Scottie Gold Mine using a staged, low-footprint, high-grade approach. The Scottie Gold Mine is located 32 km north of Stewart, BC, accessible via the Granduc Road, connecting to Highway 37A. The historic Scottie Gold Mine operated in the early 1980s, produced around 95,426 oz of gold, and employed around 80-100 people. The historic Scottie Gold Mine was an underground mining operation, with all supporting infrastructure (processing equipment, etc.) also located underground.

Located within the Nisga'a Lisims Government Lands (Nass Area) and within the Tsetsaut Skii km Lax Ha (TSKLH) Consultative Area Zones, the proposed re-opening of the Scottie Gold Mine would combine the historic underground workings with limited new open-pit and underground development, with ore sorted and shipped directly via the deep-water port in Stewart, BC. This brownfield redevelopment leverages existing infrastructure and applies modern open-pit and underground methods to create a sustainable, lower-impact operation. Operations will employ 200 - 250 people over a seven-year mine life.

Scottie Resources is currently conducting mineral exploration and environmental studies to inform an application to the BC Government to re-start the Scottie Gold Mine.

This survey includes questions about your activities in areas surrounding the Proposed Mining Area.

A map showing these areas is provided on Page 5 of this survey.

You will be asked about activities within the 3 areas as shown on the map:

- the Proposed Mining Area,
- an area within 500 m of the site,
- and a broader region extending up to 5 km from the Proposed Mining Area.

Please select the response that best fits the location(s) of your activities. If you are unsure about whether you use the specific areas shown in this map, please provide a best guess.

1. Please select one of the following options to let us know if you are (Select one):

- ☐ A citizen of Nisga'a Nation
- ☐ A member of Tsetsaut Skii km Lax Ha Nation
- ☐ A member of another First Nation/ Indigenous group (Please specify): _____
- ☐ A non-Indigenous person
- ☐ Prefer not to say

2. Which community do you reside in or live close to? (Select one)

(Note: If you reside in more than one location throughout the year, please select the location associated with your permanent mailing address. If you select the “other” comment box, do not provide your address; only provide the name of the community, province or country you live in. Thank you!)
